
Far-Field Aliasing vs Scalable Angular Spectrum: Standard ASM vs SAS ($\lambda = 532$ nm, $z = 0.80$ m)
(a) Standard ASM Intensity (Fixed Grid, $z = 0.80$ m)
(b) Scalable Angular Spectrum Intensity (Scaled Grid)
(c) Standard ASM Error Map (Aliasing)
(d) Scalable Angular Spectrum Error Map
Relative L_2 error: 15.34%
Relative L_2 error: 1.28%
x [mm]
y [mm]
Intensity $I/I_{\mathrm{ref,\,max}}$
Absolute Error $|I - I_{\mathrm{ref}}|/I_{\mathrm{ref,max}}$
